Jocelyn Bergdorff

Senior Lead Software Engineer excelling in Front-End Development at Comcast

Downingtown, Pennsylvania, United States

Summary

Experienced technical leader with a proven track record of guiding complex software projects from inception to launch and beyond. My background in Business Administration and Management (Webber International University) provides a strong foundation for bridging the gap between technology and business strategy. I'm a firm believer in mentorship and empowering teams to embrace innovation and continuous improvement. My dedication to excellence is reflected in achievements like the 2024 Overachiever Award from Comcast.

Experience

Comcast

Senior Software Engineer Technical Lead

October 2023 - Present (1 year 11 months)

West Chester, Pennsylvania, United States

Responsibilities:

- * Technical Leadership: Provide technical guidance and direction to a team of frontend developers, ensuring adherence to best practices and architectural principles.

- * Project Management: Assists with the planning, execution, and delivery of complex software development projects, from conception to launch and through the MTB phase.

- * Collaboration: Foster a collaborative environment, working closely with product owners, designers, and other stakeholders to define project scope, requirements, and timelines.
- * Mentorship: Mentor and coach junior developers, providing support, feedback, and opportunities for growth.
- * Code Development: Actively contribute to the codebase, developing high-quality, maintainable code using React, Angular, Next.js, and other relevant technologies.
- * Code Reviews: Conduct thorough code reviews to ensure code quality, consistency, and adherence to standards.
- * Testing: Implement and maintain comprehensive testing strategies, utilizing frameworks like Jest to ensure the delivery of robust and reliable applications.
- * CI/CD: Manage and optimize CI/CD pipelines using tools like Concourse and GitHub Actions to automate build, test, and deployment processes.
- * Problem Solving: Identify and resolve technical challenges, providing innovative solutions to complex problems.
- * Communication: Effectively communicate technical concepts and project updates to both technical and non-technical audiences.
- * Technology Exploration: Stay abreast of emerging technologies and industry trends, evaluating and recommending new tools and frameworks to enhance development processes.
- * Documentation: Create and maintain clear and concise technical documentation, including design documents, API specifications, and user guides.

Xavient Digital

Sr Technical Lead (Comcast)

October 2020 - October 2023 (3 years 1 month)

West Chester, Pennsylvania, United States

- * Design, develop, and implement high-quality software solutions using modern frontend frameworks like React and Angular, aligned with Comcast's project requirements.
- * Provide technical guidance and mentorship to a team of software engineers, ensuring adherence to coding standards, best practices, and architectural principles.
- * Lead code reviews, provide constructive feedback, and foster a culture of continuous learning and improvement within the team.
- * Troubleshoot and debug complex software issues, identifying root causes and implementing effective solutions.
- * Stay abreast of emerging technologies and industry trends, evaluating their potential application within the project.
- * Project & Team Management:
 - * Collaborate effectively with Comcast stakeholders, including product owners, project managers, and other engineers, to understand project requirements and deliver successful outcomes.
 - * Contribute to sprint planning, task estimation, and project tracking activities, ensuring timely delivery of project milestones.
 - * Foster a collaborative and supportive team environment, promoting effective communication and knowledge sharing.
 - * Delegate tasks effectively, providing clear instructions and expectations to team members.
 - * Monitor team performance, identify areas for improvement, and provide constructive feedback.
- * Quality Assurance & Testing:
 - * Develop and execute comprehensive test plans, ensuring the quality and reliability of software deliverables.
 - * Utilize automated testing frameworks like Jest to streamline testing processes and ensure code coverage.

- * Collaborate with QA engineers to identify and resolve software defects.
- * Communication & Documentation:
 - * Clearly and effectively communicate technical concepts and project updates to both technical and non-technical audiences.
 - * Create and maintain accurate technical documentation, including design documents, API specifications, and user guides.
